GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

The above discussion is provided for general information purposes only. For more specific information concerning water rights, please contact your attorney or the Office of Water Resources in California.

upstream. The filing of a statement of water diversion and use under section 20 of the Water Resources Act does not affect the State's authority to determine if additional water is available for future appropriators.

An appropriate right is required to use of water in time of periodical and/or short periods of water scarcity; appropriate rights may be exercisable only where there is a grant made by preparatory authorities to waters "foreig[n]" to the natural stream system.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water from the stream or lake for his or her own purposes. Riparian rights must be used in the same manner as other natural resources such as timber, minerals, and fish and game. A riparian right does not give the owner the right to pollute the stream or lake or to interfere with the natural course of the stream or lake.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

## **GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA**

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of ground water.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

**Statement of Water Division and Use** must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water appropriated from their diversion, and (3) assists the State to determine if additional use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion. For general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Statement of Water Division and Use"
- "Appropriation of Water in California"

## **STATEMENT OF WATER DIVERSION AND USE**

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water. Helix Irrigation District  
Address 8111 University Ave., La Mesa, California (P.O. Box 518)

B. Name of body of water at point of diversion Boulder Creek  
Tributary to San Diego River

C. Place of diversion: NE 1/4 Section 5, Township 145, Range 48 S. B. D.R.M.  
San Diego County, or locate it on sketch of section grid on reverse side with regard to section lines or  
prominent local landmarks.

D. Name of works **Cuyamaca Dam**

E. Capacity of diversion works 50 cubic feet per second  
Capacity of storage reservoir 11,730 acre-feet

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of creek measured, etc.

**150,000 PERSONS**

Maximum annual water use in recent years 1966 - 3183.3

**Minimum annual water use in excess acre-feet** 1963 - 0

Type of diversion facility: gravity  concrete

**Method of measurement:**  mm  cm  inches  feet  yards  miles

F. Purpose of use (what water is being used for) **Municipal**

c. General description or location of place of use (use sketch of section grid on reverse side if you desire)  
**31,468 Acres Easterly of the City of San Diego including the Cities of El Cajon, La Mesa  
and unincorporated areas of Lemon Grove and Spring Valley.**

H. Year of such use as nearly as known. 1897

I. Name of person filing statement: Byron M. Miller  
Position: General Manager Organization: Helix Irrigation District  
Address: 8111 University Ave., La Mesa, California 92041 (P.O. Box 518)

I certify that the foregoing statements are true to my knowledge and belief.
